

## **HOBART's TWO-LEVEL-WASHER receives Gold STAR AWARD**

Offenburg – Simultaneous washing on two levels in one machine: Warewashing market leader HOBART recently received several awards for this revolutionary design, and can now proudly accept another prize. The readers of the trade magazines Tophotel and HOTEL + TECHNIK gave the gold STAR AWARD in the 'Technology' category to the TWO-LEVEL-WASHER by the Offenburg-based company.

The readers of the two print media give this award to the best products and services for the hotel industry. The jury is made up of the editorial staff of the magazines who impartially select three companies per category. Then, the readers decide which company receives gold, silver, and bronze awards.

### **Two in one: The world's first TWO-LEVEL-WASHER**

The hotel managers were particularly impressed by the innovative technology of the TWO-LEVEL-WASHER and the resulting increase of capacity per wash cycle. This dishwasher is not only extremely efficient but also has a very small footprint, which makes it suitable for smaller kitchens as well. Despite the second washing level, the TLW does not take up any more space than a conventional dishwasher on account of its compact design.
